Rotweiss Refinishing Products

The Rotweiss Refinishing Products not only enable you to buff up weather-beaten paints to their original gloss, you also can use them to remove scratches, trapped dirt, overspray etc. and to seal painted surfaces.

The majority of the products in the kits are produced by RotWeiss, a german company that has built a solid reputation as “problem-solver” with owners of Old-timers, yachts, mobile homes and gliders.

The recent extension of the RotWeiss product range not only has confirmed this reputation, but also has significantly broadened the customer base.

The products are easy to apply and highly economical.
