Product Division CR
Car Reconditioning Systems

Glue Tab Retrofit Kit (Würth)

The Glue Tab Retrofit Kit contains a universal Glue Tab Clamp, which can accommodate both the small, round Glue Tabs (up to 30 mm diameter) and the larger, round and oval Glue Tabs.

The Würth Dent Lifting Tool only can accommodate the small Glue Tabs. If retrofitted with the universal Glue Tab Clamp, this tool also can accommodate the larger Glue Tabs and hence can be used for a much wider range of applications.

Glue Tab Retrofit Kit (W+S)

The Glue Tab Retrofit Kit contains a universal Glue Tab Clamp, which can accommodate the plastic round and oval Glue Tabs, which now are widely used.

The Wieländer+Schill Dent Pulling Jig with a central wing nut only can accommodate special threaded Glue Tabs. If retrofitted with the universal Glue Tab Clamp and 2 spacers, this jig can accommodate all the above-mentioned plastic Glue Tabs and hence can be efficiently used for a much wider range of applications.

Glue Tab Retrofit Kit (Berner)

The Glue Tab Retrofit Kit contains a universal, turnable Glue Tab Clamp, which can accommodate the plastic round and oval Glue Tabs, which now are widely used.

The Berner Dent Lifting Tool only can accommodate small Glue Tabs of a different shape. Another disadvantage is the fixed Glue Tab Clamp.

If retrofitted with the universal, turnable Glue Tab Clamp, this tool can accommodate all the common Glue Tabs and hence can be used more efficiently and for a much wider range of applications.
