Set TW5070

TwenTec Rota-Grip Tool Set

The TwenTec Rota-Grip Dent Repair Tools are fitted with ratcheting handles, which can be locked in 26 different positions.

Simply depress the thumb button on the back of the handle to change the handle position. No need to remove the tool from the job, a significant time-saving.

With the ratcheting handle you always can select the ergonomically optimal handle position, which prevents muscle problems.

With its variation in tips and tool lengths the TwenTec Rota-Grip Tool Set can be used for a wide range of dent repair jobs, especially on doors.
