Product Division CR  
Car Reconditioning Systems

## WPT Windscreen Repair Systems

The new WPT Windscreen Repair Systems program now consists of four systems for the professional repair of small damages in laminated wind-screens: “starbreaks”, “bullseyes” and cracks.

No need anymore for an expensive windshield replacement, with the WPT systems you will be able to repair such damages for only a fraction of the usual replacement costs.

The WPT repair resins are known for their easy processing and long-lasting quality : even after a long time the optical clarity remains unchanged.

Well-established institutes like MPA and TÜV have tested and approved the WPT Systems.

Partnumber	Description
WP5200	WPT Windscreen Repair Custom Kit (12 Volt)

## TwenTec Windscreen Repair Kits

TW4902

The new TwenTec Windscreen Repair program now consists of two systems for the professional repair of small damages in laminated windscreens: “starbreaks”, “bullseyes” and cracks. No need anymore for an expensive windshield replacement, with the TwenTec kits you will be able to repair such damages for only a fraction of the usual replacement cost.

The TwenTec repair resin is known for its easy processing and long-lasting quality : even after a long time the optical clarity remains unchanged.

The TwenTec repair philosophy is based on simplicity of design and ease of operation. With the unique Pedestal Resin Chambers, mounted on the damaged glass, and the special Injector Assembly, every repair job will achieve professional results without requiring special skills or extensive training.
