### WPT-MIX Plastic Repair Kits

WPT-MIX is a unique two components poly urethane product that can be used for a large range of plastic repair and bonding jobs. WPT-MIX also hardens when applied as a thin layer making it suitable for use as filler. It can be kept for a long time (even opened cartridges) and it can be used as well for bonding metal sheets, glass etc. An increasing number of car manufacturers, dealer organisations and body shops is taking advantage of these specific properties. You have the choice between 50 and 220 ml cartridges and between drying times of:

- 1,5 minutes (WPT-MIX 100), 50 ml
- 3,5 minutes (WPT-MIX 200), 50 ml and 220 ml
- 10 minutes (WPT-MIX 600), 220 ml
