

WPT CAR RECONDITIONING SYSTEMS

Repairing Instead Of Replacing

WPT Systems: Sensible Investments In Alternative Repair Technologies

Until recently minor damages to the bodywork or interior of the car often had major consequences. Usually the damaged parts needed to be replaced - expensive and time-consuming operations!

Now, with the WPT repair systems, it is possible to repair such minor damages professionally for only a fraction of the usual replacement costs. No need for replacements, repaint jobs, etc. any more. Good for both your budget and the environment! The WPT systems enable you to react perfectly to the fast changing market demands and requirements - e.g. of insurance companies. They also enable you to increase the value of used cars quickly. In short, an investment that pays off after a few repairs already.

WPT Series 6500 Paintless Dent Removal Systems

By far the most widely used systems in Europe. Fast and effective removal of dents caused by parking, transportation, or hail damages. Treatment is easy, even underneath the braces. Offers 100 % repair results.

WPT Series 6100 Dent Pulling Systems

The ideal supplement to the WPT Paintless Dent Removal Systems. Small dents, that cannot be reached from the inside, now can be repaired from the outside without damaging the paint. The repair method is simple and easy to learn.

WPT Series 5000 Windscreen Repair Systems

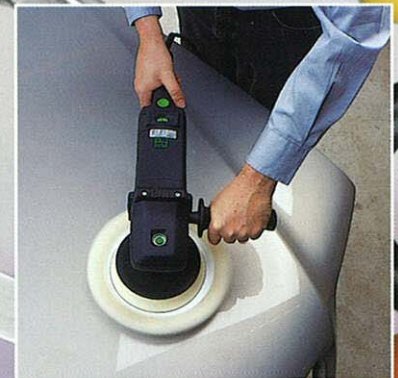

Repairing windscreen damages like pits and stars in layered windscreen glass is easy with the WPT Windscreen Repair Systems. Repair time is approx. 20 minutes, without the need to disassemble the windscreen.

WPT Series 6400 Paint Correction Systems

These high-quality systems not only enable you to buff up weather-beaten paints to their original gloss, you also can use them to remove scratches, trapped dirt, overspray etc. Easy to apply and highly economical.

WPT Series 6200 Plastic Repair Systems

The new WPT-MIX program consists of 2 systems for the repair and bonding of any type of plastic. Cartridges of 50 and 220 ml. WPT-MIX also hardens when applied as a thin layer and can be kept for a long time (even opened cartridges).

WPT Series 6600 Structure Repair Systems

With the WPT Structure Repair Systems you can repair damages to the structure of bumpers, dashboards and leather seats and trims. The materials to reproduce grain patterns and textures give a virtually undetectable repair.

The WPT Structure Repair Systems however are not only meant for the repair of minor surface structure damages, but are also very well suited for reapplying the desired structure after the repair of the parts underneath (e.g. holes in bumpers).

WPT structure repair products and repair techniques are specifically developed for these applications and give longlasting results. Using the WPT Series 6900 Paint Repair Systems you can give the repaired surface its original colour and gloss.

WPT Series 6700 Interior Repair Systems

Damages to velour upholstery (holes from burns and such) no longer need to be problematic. The WPT Velour Repair Systems contain sufficient material to reproduce all current colours and patterns, so you can make repairs that are always virtually invisible to the eye. Scratches, cuts or holes in leather or vinyl seats can be repaired in a cost effective way with the new WPT Leather & Vinyl Repair Systems.

WPT Series 6800 Paint Repair System (Metals)

Professional repair of car paint damages (chips, scratches etc) for only a fraction of the usual costs: our new WPT Series 6800 Paint Repair System with its 65 waterborne paints and our tailored repair method enables you to make invisible "Spot Repairs" in a fast and environment-minded way. All current car colours can be produced.

WPT Series 6900 Paint Repair Systems (Plastics)

Using the WPT Series 6900 Paint Repair Systems you can give repairs to bumpers, dashboards and leather seats and trims the "finishing touch", resulting in virtually undetectable repairs. The colour- and transparent coaters that were specifically developed for these applications, give longlasting high-quality results, in terms of colour as well as gloss.

We offer you two options: either you mix the colours yourself using the 9 basic colours (waterborne or solvent-base) to produce all current colours, or you use our aerosols with the 25 most current bumper colours and the 45 most current dashboard colours.

WPT

WPT Series 7200 Clay System

A unique product for the safe removal of paint spots, overspray, chemical contamination and traces of corrosion.

WPT Series 8000 Odour Removal System

New system to remove tobacco smells, animal odour and other disagreeable smells from car interiors. Ideal for used cars.

Training

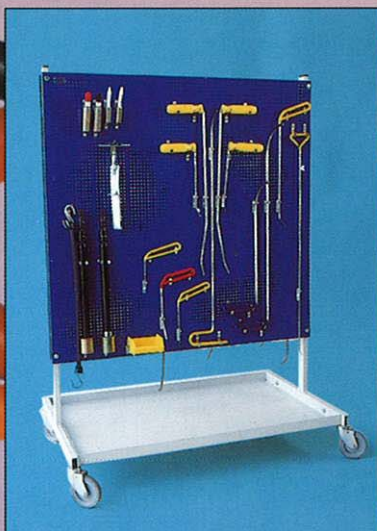

Good training is essential, if you want to work properly with the WPT systems, and get the best returns from your investment. You will develop the required skills step by step at the special WPT training courses, which are organised regularly all across Europe.

Accessories

WPT supplies a wide range of accessories for reconditioning jobs: from tool trolleys, creeper seats, paint stands and benches to cleaning products and pad washers.
