UF-Texco Steering Boots

UF-Texco Steering Boots offer distinct advantages :

- Quality : premium nitrile construction combined with a superior design ensures a long and trouble-free service life
- Time savings: with the new installation cone the UF-Texco Steering Boot can be easily expanded over the track rod end. Removal of these ends is no longer required. Installation time is substantially reduced. No need for retracking anymore !

Each UF-Texco Steering Boot Kit includes 2 steering boots, 4 plastic clamps and the new installation cone.

Boots with an air-hose for Power-Steering systems are available as well.
