## BootGun

The BootGun facilitates the installation of universal CV boots on the car.

No need anymore to use other installation tools or lubricants.

With this new tool the job can be done faster, cleaner and safer.

The universal CV boot is stretched to the desired diameter and then pushed over the CV-joint.

The BootGun operates on compressed air (max. 8 bar)

The maximum CV-joint diameter is 115 mm.

P/N	Description
SP2110	BootGun, 25-115 mm
