## TwenTec Systems : Smart Investments In Alternative Repair Technologies

Until recently minor damages to the bodywork or interior of the car often had major consequences. Usually the damaged parts needed to be replaced - expensive and time-consuming operations!

Now, with the TwenTec reconditioning systems, it is possible to repair such minor damages professionally for only a fraction of the usual replacement costs. No need for replacements, repaint jobs, etc. any more. Good for both your budget and the environment!

The TwenTec systems enable you to react perfectly to the fast changing market demands and requirements - e.g of insurance companies. They also enable you to increase the value of used cars quickly. In short, an investment that pays off after a few repairs already.

### TwenTec Dent Repair Systems

TwenTec offers three methods for the removal of dents in car bodies :

- Small dents can be repaired quickly and effectively with the Dent Repair Glue Systems (Dent Lifter, Slide Hammer) which do not require major investments in tools and training.
- With the Dent Repair Tool Systems you will be able to repair not only the small dents, but also larger and sharp dents without respray (if the original paint has not been damaged)
- The Dent Repair Air Cushion method has been developed for the repair of large dents, especially in areas that are hard to reach. These damages normally require a respray.

### TwenTec Windscreen Repair Systems

Repairing windscreen damages like pits and stars in layered windscreen glass is easy with the TwenTec Windscreen Repair Systems. Repair time is approx. 20 minutes, without the need to disassemble the windscreen.

### TwenTec Paint Refinishing Systems

These high-quality systems, based on the famous German Rot-Weiss products, not only enable you to buff up weather-beaten paints to their original gloss, you also can use them to remove scratches, trapped dirt, overspray etc. Easy to apply and highly economical.

### **TwenTec Plastic Welding System**

The TwenTec Plastic Welding System is ideal for making quality repairs to virtually any type of plastic, even “problem plastics” like TPO and PP.

The repair method is quite simple and offers a considerable time saving, compared to the traditional two-part adhesive repair method.

In many cases the damaged part does not need to be disassembled.

### **TwenTec Structure Repair Systems**

With the TwenTec Structure Repair Systems you can repair damages to the structure of dashboards, leather seats and trims. The materials to reproduce grain patterns and textures give a virtually undetectable repair.

The TwenTec Structure Repair Systems however are not only meant for the repair of minor surface structure damages, but are also very well suited for reapplying the desired structure after the repair of the parts underneath (e.g holes in dashboards, cuts in leather).

TwenTec structure repair products and repair techniques are specifically developed for these applications and give long-lasting results.

### **TwenTec Fabric Cleaning System**

The TwenTec Fabric Cleaning System is built around the famous Tornador Gun.

This air-operated Spray-Gun vaporizes the special TwenTec cleaning liquid and sprays it under pressure on to the fabric parts to be cleaned.

The cleaning properties of the liquid are optimally used in this way. The result : a very thorough cleaning of fabric parts in the car interior. Loose mats can be treated as well with the same amazing results.

After the treatment the Tornador Gun can be used to dry the cleaned areas with air.

The TwenTec cleaning liquid is a concentrate, which should be diluted with water, and which therefore is very economical in usage.

### **TwenTec Paint Chip Repair System**

The TwenTec Paint Chip Repair System enables you to repair small damages to car paint quickly and efficiently for a fraction of the cost of repainting. Using a new method and especially composed paints the repair is executed in such a way that it is practically invisible where the damage was before the reparation.

The TwenTec Paint Chip Repair Kit contains 24 ready mixed colours. These are the most common colours. Other colours and/or brand specific colour sets can be supplied as well.

## TwenTec Paint Sealing System

A unique system, also based on the German Rot-Weiss products, for a long-lasting protection and sealing of painted surfaces. Part of the system is the Rim Sealer, which has the added feature of facilitating the cleaning of rims.

## Training

Good training is essential, if you want to work properly with the TwenTec systems, and get the best returns from your investment. You will develop the required skills step by step at the special TwenTec training courses, which are organized regularly all across Europe.

## Accessories

WPT Systems Europe supplies a wide range of accessories for reconditioning jobs : from Tool Trolleys, Creeper Seats and Infra-Red Dryers to Pad Washers and Paint Files. Our web-site [www.wpt.nl](http://www.wpt.nl) gives a complete overview.
