WPT Fabric & Velour Repair Kits

Burnt seats and carpets can reduce the value of cars considerably. Replacement of the damaged parts normally is very expensive and therefore in most cases not feasible. A repair with the WPT Fabric & Velours Repair System now offers a cost effective alternative to replacement. The repair takes less than half an hour and can be carried out in situ. The special repair method and the high quality repair components guarantee a professional and permanent repair.

Both WPT Fabric & Velours Repair Kits contain sufficient material to carry out over 200 repairs. The Kits use 24 respectively 44 different velour fibres to match existing colors and patterns.

WPT Leather & Vinyl Repair Kits

Scratches, cuts and holes in leather or vinyl seats and upholstery can reduce the value of cars considerably. Replacement of the damaged parts normally is very expensive and therefore in most cases not feasible.

A repair with the WPT Leather & Vinyl Repair System now offers a cost effective alternative to replacement.

The special repair method and the high quality repair components guarantee a professional and permanent repair. Both kits contain a special 2-component product to reproduce the surface structures.

The Leather & Vinyl Refinishing Kit enables you to repair surface damages (scratches etc), with the Leather & Vinyl Repair Kit you can, on top of that, also repair thru damages (cuts, holes).

Repainting of the repair area with the waterborne paints from the WPT Kits 6902 and 6903 gives the repair job the "finishing touch".
